

SCAFFOLD PROJECT

BOLD AND BRILLIANTLY BUILT BY BEAST SCAFFOLDING

Beast Scaffolding has been a proud user of Layher products for several years. This recent project in Chiswick, Sydney, is a great example of precision planning and execution.

The 24m high façade was scaffolded using Layher Allround LW with working platforms every 2 metres. Access to the garages was maintained using a clever bridge section constructed from an Allround Truss. Projects like this show how the right scaffold system and the right team can deliver access solutions that are safe, efficient, and tailored to site conditions.

A big thank you to Tom McCheane for sharing the fantastic project photos with us. Well done to the team at Beast Scaffolding, we're proud to be part of your journey.
