

SCAFFOLD PROJECT

Layher

More Possibilities. The Scaffolding System.

BLACK RIVER BRIDGE

Jett Scaffolding, based in Townsville, completed this project that allowed inspection of sections of the Black River Bridge structure while carrying out light repairs.

The team at Jett Scaffolding took on the challenge of a suspended structure over the river and designed a tailored solution using Layher Allround. The ability to cantilever provided easy access to the entire length of the underside of the bridge. A clever idea with a clever solution equals more possibilities.

Jett Scaffolding Managing Director, Tony Batten, said, "Our focus is always on providing efficient access solutions. The versatility of the Layher Allround scaffolding system enables us to address both straightforward and challenging problems, without compromising on safety".

Thank you to Tony Batten, Managing Director of Jett Scaffolding Pty Ltd, for providing these photos.
